

## CONTENTS

<b>Puig V.</b> Fault diagnosis and fault tolerant control using set-membership approaches: Application to real case studies .....	619
<b>Tong S., Liu C. and Li Y.</b> Robust adaptive fuzzy filters output feedback control of strict-feedback nonlinear systems .....	637
<b>Muhafzan</b> Use of semidefinite programming for solving the LQR problem subject to rectangular descriptor systems .....	655
<b>Busłowicz M.</b> Robust stability of positive continuous-time linear systems with delays .....	665
<b>Górecki H.</b> Analytic solution of transcendental equations .....	671
<b>Correia A., Matias J., Mestre P. and Serodio C.</b> Derivative-free nonlinear optimization filter simplex .....	679
<b>Morawski M. and Zajęzkowski A.M.</b> Approach to the design of robust networked control systems .....	689
<b>Han S.E.</b> Ultra regular covering space and its automorphism group .....	699
<b>Emambakhsh M., Ebrahimnezhad H. and Sedaaghi M.H.</b> Integrated region-based segmentation using color components and texture features with prior shape knowledge .....	711
<b>Chang Y.F., Lee J.C., Mohd Rijal O. and Syed Abu Bakar S.A.R.</b> Efficient online handwritten Chinese character recognition system using a two-dimensional functional relationship model .....	727
<b>Gold R.</b> Control flow graphs and code coverage .....	739
<b>Barkalov A., Titarenko L. and Bieganowski J.</b> Reduction in the number of LUT elements for control units with code sharing .....	751
<b>Wieczorek R.</b> Markov chain model of phytoplankton dynamics .....	763
<b>Fujarewicz K.</b> Planning identification experiments for cell signaling pathways: An NF $\kappa$ B case study .....	773
<b>Śmieja J.</b> Coupled analytical and numerical approach to uncovering new regulatory mechanisms of intracellular processes .....	781
