

CONTENTS

Special section

Chen W., Khan A.Q., Abid M. and Ding S.X. Integrated design of observer based fault detection for a class of uncertain nonlinear systems	423
Khelassi A., Theilliol D. and Weber P. Reconfigurability analysis for reliable fault-tolerant control design ...	431
Bonfè M., Castaldi P., Mimmo N. and Simani S. Active fault tolerant control of nonlinear systems: The cart-pole example	441
Boussaid B., Aubrun C., Abdelkrim M.N. and Ben Gayed M.K. Performance evaluation based fault tolerant control with actuator saturation avoidance	457
Fang S. and Blanke M. Fault monitoring and fault recovery control for position-moored vessels	467
Dettmann K-U. and Söffker D. Adaptive modeling of reliability properties for control and supervision purposes	479

Regular section

Hild P. A sign preserving mixed finite element approximation for contact problems	487
Ztot K., Zerrik E.H. and Bourray H. Regional control problem for distributed bilinear systems: Approach and simulations	499
Guillet J., Mourllion B., Birouche A. and Basset M. Extracting second-order structures from single-input state-space models: Application to model order reduction	509
Kaczorek T. New stability conditions for positive continuous-discrete 2D linear systems	521
Dulęba I. and Jagodziński J. Motion representations for the Lafferriere–Sussmann algorithm for nilpotent control systems	525
Saeedi H., Mollahasani N., Mohseni Moghadam M. and Chuev G.N. An operational Haar wavelet method for solving fractional Volterra integral equations	535
Shin Y.J. and Park C.H. Analysis of correlation based dimension reduction methods	549
Styrcz A., Mrozek J. and Mazur G. A neural-network controlled dynamic evolutionary scheme for global molecular geometry optimization	559
Chydzński A. and Chróst Ł. Analysis of AQM queues with queue size based packet dropping	567
