

CONTENTS

Jamouli H., El Hail M.A. and Sauter D. A mixed active and passive GLR test for a fault tolerant control system.....	9
Uciński D. Sensor network scheduling for identification of spatially distributed processes	25
Yang F., Shah S.L. and Xiao D. Signed directed graph based modeling and its validation from process knowledge and process data.....	41
Ungermann M., Lunze J. and Schwarzmann D. Test signal generation for service diagnosis based on local structural properties	55
Niemann H.H. A model-based approach to fault-tolerant control	67
Yang H., Jiang B., Cocquempot V. and Lu L. Supervisory fault tolerant control with integrated fault detection and isolation: A switched system approach	87
Olive X. FDI(R) for satellites: How to deal with high availability and robustness in the space domain?	99
Edwards C., Alwi H. and Tan C.P. Sliding mode methods for fault detection and fault tolerant control with application to aerospace systems	109
Jain T., Yamé J.J. and Sauter D. Model-free reconfiguration mechanism for fault tolerance	125
Weber P., Boussaid B., Khelassi A., Theilliol D. and Aubrun C. Reconfigurable control design with integration of a reference governor and reliability indicators.....	139
Patton R.J., Chen L. and Klinkhieo S. An LPV pole-placement approach to friction compensation as an FTC problem	149
Montes de Oca S., Puig V., Witczak M. and Dziekan Ł. Fault-tolerant control strategy for actuator faults using LPV techniques: Application to a two degree of freedom helicopter	161
Gáspár P., Szabó Z. and Bokor J. LPV design of fault-tolerant control for road vehicles	173
Xu D., Jiang B. and Shi P. Nonlinear actuator fault estimation observer: An inverse system approach via a T-S fuzzy model.....	183
Ichalal D., Marx B., Ragot J. and Maquin D. New fault tolerant control strategies for nonlinear Takagi–Sugeno systems	197
Yetendje A., Seron M.M. and De Doná J. Robust multisensor fault tolerant model-following MPC design for constrained systems	211
Patan K. and Korbicz J. Nonlinear model predictive control of a boiler unit: A fault tolerant control study ...	225
