

## Contents

<b>Béal P., Koko J. and Touzani R.</b>	Mesh $r$ -adaptation for unilateral contact problems .....	9
<b>Chau O. and Motreanu V.V.</b>	Dynamic contact problems with velocity conditions .....	17
<b>Fernandes L.M., Figueiredo I.N. and Júdice J.J.</b>	On the solution of a finite element approximation of a linear obstacle plate problem .....	27
<b>Hild P.</b>	On finite element uniqueness studies for Coulomb's frictional contact model .....	41
<b>Hoarau-Mantel T.-V. and Matei A.</b>	Analysis of a viscoelastic antiplane contact problem with slip-dependent friction .....	51
<b>Huerta A., Rodríguez-Ferran A. and Díez P.</b>	Error estimation and adaptivity for nonlinear FE analysis .....	59
<b>Ionescu I.R. and Nguyen Q.-L.</b>	Dynamic contact problems with slip-dependent friction in viscoelasticity .....	71
<b>Karamian P., Sanchez-Hubert J. and Sanchez Palencia É.</b>	Non-smoothness in the asymptotics of thin shells and propagation of singularities. A hyperbolic case .....	81
<b>Quintanilla R.</b>	The energy method for elastic problems with non-homogeneous boundary conditions .....	91
<b>Rodríguez J.M.</b>	A nonlinear model of a turbine blade by asymptotic analysis .....	101
<b>Stavroulaki M.E. and Stavroulakis G.E.</b>	Unilateral contact applications using FEM software .....	115
<b>Trabucho L.</b>	Analysis of optimality conditions for some topology optimization problems in elasticity .....	127
