

applied mathematics and computer science

AIMS & SCOPE

The *International Journal of Applied Mathematics and Computer Science* strives to meet the demand for the presentation of interdisciplinary research in various fields related to control theory, applied mathematics, scientific computing, and computer science. In particular, it publishes high quality original research results in the following areas:

- modern control theory and practice
- artificial intelligence methods and their applications
- applied mathematics and mathematical optimisation techniques
- mathematical methods in engineering, computer science, and biology.

We are primarily interested in presenting theoretical and application-oriented papers dealing with the following topics:

- control theory, including optimal control, system identification, adaptive and robust control, multivariable control, and non-linear systems
- dynamical systems, including spatiotemporal processes, control problems, state and parameter estimation, and sensor networks
- fault detection and diagnosis, including model-based approaches, observers, and classifiers
- fault-tolerant control, including the control of continuous-variable and quantised systems
- robotics, including modelling and simulation, mobile robots, and optimal trajectory planning
- mathematical modelling and simulation, including numerical algorithms
- optimisation, including mathematical optimisation techniques, global optimisation, and evolutionary algorithms
- classification and pattern recognition
- artificial intelligence, including neural networks, knowledge engineering, reasoning and learning models, expert and decision support systems, fuzzy systems, and search methods
- mathematical biology
- applications in engineering and medicine.

The editors welcome proposals for exchange between similar journals. Also, all persons interested in bringing out special issues of *AMCS* are encouraged to contact the Editor-in-Chief. Such issues may be published on any important and timely subject within the scope of the journal. All papers proposed for specials should be referred and meet the same criteria for scientific quality as articles presented in regular issues.

The publication of *AMCS* is financially supported by the Ministry of Science and Higher Education in Poland and the University of Zielona Góra.

For more information, visit our website at www.amcs.uz.zgora.pl.

About

The International Journal of Applied Mathematics and Computer Science is a quarterly published jointly by the University of Zielona Góra and the Lubuskie Scientific Society in Zielona Góra, Poland, since 1991. It strives to meet the demand for the presentation of interdisciplinary research in various fields related to control theory, applied mathematics, scientific computing, and computer science.

In particular, AMCS publishes high quality original research results in the following areas: modern control theory and practice, artificial intelligence methods and their applications, applied mathematics and mathematical optimisation techniques, and mathematical methods in engineering, computer science and biology.

Current indexing and abstracting

ACM Digital Library, Advanced Technologies Database with Aerospace, Applied Mechanics Reviews, BazTech, Compendex, Computer Abstracts International Database, Computer & Communications Security Abstracts, Computer and Information Systems Abstracts, Current Index to Statistics, Current Mathematical Publications, DBLP Computer Science Bibliography, Digital Library of Zielona Góra, Earthquake Engineering Abstracts, EBSCO, Google Scholar, High Tech Research Database, INSPEC, Journal Citation Reports/Science Edition, Mathematical Reviews, MathSciNet, Mechanical & Transportation Engineering Abstracts, Polish Digital Mathematics Library, Science Citation Index Expanded (SciSearch®), Scopus-Elsevier, Summon by Serials Solutions, Technology Research Database, VINITI, Zentralblatt MATH.

Impact Factor

1.390 (2013), 1.008 (2012), 0.487 (2011), 0.794 (2010), 0.684 (2009) 5-Year IF: **1.317** (2013), 1.146 (2012)

Editor-in-Chief

Józef KORBICZ University of Zielona Góra, Poland

Deputy Editor

Requirements in brief

Our basic rules include electronic paper submission and processing, the LaTeX format following a special AMCS style, a license to publish, and a voluntary page charge.

Paper submission

Paper proposals may be submitted only through our on-line submission system. If suitable for our journal, the papers will be subject to a full review procedure, and a decision on whether or not to accept the paper will be made based on the reviewers' comments.

Paper style

The style of papers to be published in AMCS is determined by a special LaTeX class, which is described in detail in our instructions for authors. No other formats are accepted.

License to publish

Currently, all authors must sign the license to publish upon paper acceptance. The license governs in detail the commercial and non-commercial use of papers published by our journal, and determines user and author rights.

Page charge

Papers published in AMCS are currently subject to a voluntary page charge, which will be invoiced through the authors to their institutions. Publication is not dependent on the payment of this charge. However, for papers exceeding the required length, mandatory excess page charges will be applied.

Provisions

One sample copy of the journal and the electronic version of the paper are provided for authors once the issue has been published.

Details, submission and downloads

The complete guide for authors can be found on our website at www.amcs.uz.zgora.pl.
