QUARTERLY

March 2026

2026 • Volume 36 • Number 1

 International Journal of  
**applied mathematics  
and computer science**

University of Zielona Góra Press, Poland

## About

The *International Journal of Applied Mathematics and Computer Science* is a quarterly published in Poland since 1991 by the University of Zielona Góra in partnership with De Gruyter Brill (Paradigm) and historically with the Lubuskie Scientific Society, under the auspices of the Committee on Automatic Control and Robotics of the Polish Academy of Sciences. It strives to meet the demand for the presentation of interdisciplinary research in various fields related to control theory, applied mathematics, scientific computing, and computer science.

In particular, *AMCS* publishes original, high-quality full-length research papers in the following areas: *modern control theory and practice; artificial intelligence methods and their applications; applied mathematics and mathematical optimisation techniques; and mathematical methods in engineering, computer science and biology.*

## Indexing and abstracting

ACM Digital Library, Applied Mechanics Reviews, Clarivate, DBLP Computer Science Bibliography, Directory of Open Access Journals, EBSCO, Elsevier, Google Scholar, Inspec, Mathematical Reviews (MathSciNet), ProQuest, zbMATH Open, and others.

## Current journal metrics

JCR Journal Impact Factor: 1.2 (2024)  
 JCR 5-Year Impact Factor: 1.2 (2024)  
 CiteScore: 3.4 (2024)  
 SCImago Journal Rank: 0.314 (2024)  
 Source Normalized Impact per Paper: 0.722 (2024)  
 Polish ministerial points: 100 (2024)

**EDITORS**

### Editor-in-Chief

Józef KORBICZ  
 University of Zielona Góra, Poland

### Deputy Editor

Krzysztof PATAN  
 University of Zielona Góra, Poland

### Associate Editors

Jérôme CIESLAK  
 University of Bordeaux, France  
 Anna FABIJAŃSKA  
 Łódź University of Technology, Poland  
 Martin GUGAT  
 Friedrich-Alexander University of Erlangen–Nuremberg, Germany  
 Francisco-Ronay LÓPEZ-ESTRADA  
 Technological Institute of Tuxtla Gutiérrez, Mexico  
 Silvio SIMANI  
 University of Ferrara, Italy  
 Didier THEILLIOL  
 University of Lorraine, Nancy, France  
 Guisheng ZHAI  
 Shibaura Institute of Technology, Tokyo, Japan

### Board Members

Harald ASCHEMANN  
 University of Rostock, Germany

## AIMS & SCOPE

The *International Journal of Applied Mathematics and Computer Science* strives to meet the demand for the presentation of interdisciplinary research in various fields related to control theory, applied mathematics, scientific computing, and computer science. In particular, it publishes high quality original research results in the following areas:

- modern control theory and practice
- artificial intelligence methods and their applications
- applied mathematics and mathematical optimisation techniques
- mathematical methods in engineering, computer science, and biology.

We are primarily interested in presenting theoretical and application-oriented full-length research papers dealing with the following topics:

- control theory, including optimal control, system identification, adaptive and robust control, multivariable control, and non-linear systems
- dynamical systems, including spatiotemporal processes, control problems, state and parameter estimation, and sensor networks
- fault detection and diagnosis, including model-based approaches, observers, and classifiers
- fault-tolerant control, including the control of continuous-variable and quantised systems
- robotics, including modelling and simulation, mobile robots, and optimal trajectory planning
- mathematical modelling and simulation, including numerical algorithms
- optimisation, including mathematical optimisation techniques, global optimisation, and evolutionary algorithms
- artificial intelligence, including machine and deep learning, neural networks, fuzzy systems, and search methods
- data mining, data and image processing, and big data
- classification and pattern recognition
- biomedical engineering and biomathematics
- applications in engineering and medicine.

The editors welcome proposals for exchange between similar journals. Also, all persons interested in bringing out special issues of *AMCS* are encouraged to contact the Editor-in-Chief. Such issues may be published on any important and timely subject within the scope of the journal. All papers proposed for specials should be refereed and meet the same criteria for scientific quality as articles presented in regular issues.

*AMCS* is published in Poland by the University of Zielona Góra in partnership with De Gruyter Brill (Paradigm) and historically with the Lubuskie Scientific Society, under the auspices of the Committee on Automatic Control and Robotics of the Polish Academy of Sciences.

## CONTENTS

<b>Kaczorek, T.</b> On the global stability of fractional feedback nonlinear systems with interval matrices of positive linear parts and application to electrical circuits .....	5
<b>Oprzedkiewicz, K.</b> Variable parameter, fractional order, discrete, inertial transfer function models .....	13
<b>Benítez, D., Ortega, J., Ordaz, P. and Espinoza, E.S.</b> On the gain synthesis of dynamic and integral sliding mode controllers for quad rotorcraft trajectory tracking .....	23
<b>Guerrero, C., Santibañez, V., Villalobos-Chin, J., Orrante-Sakanassi, J. and Ollervides, J.</b> BLDC motor output feedback velocity tracking control with trapezoidal approximation and no angular velocity state observer .....	37
<b>Zhang, B. and Chen, Y.</b> Root cause analysis of temporal network faults using echo state networks .....	53
<b>Boudhane, M. and Toulmi, H.</b> Real time object detection for autonomous AUVs using an attention-based fast-RCNN framework .....	67
<b>Zhang, F.</b> Event-triggered neural network voltage control for distribution networks under actuator attacks based on observers .....	81
<b>Papliński, J., Polyakova, M. and Cariow, A.</b> Algorithms for a small-sized type II discrete Fourier transform.	91
<b>Srisuradetchai, P. and Kamlangdee, P.</b> Time series forecast intervals using circular bootstrapped training simulation with invariant distance KNN .....	113
<b>Wang, X., Xu, C., Dong, L., Xie, R. and Yang, W.</b> Research on few-shot handwriting identification based on Siamese networks .....	129
<b>DeCastro-García, N., Carriegos, M.V. and Muñoz Castañeda, A.L.</b> Construction of observable and MDP convolutional codes with good decodable properties by ISO representations .....	141
<b>Pulka, A., Antolak, E. and Truś, B.</b> Two heuristic methods of hardware threads interleaving in a time predictable multitasking system .....	155
